

Auto-Ordnance introduces the new stainless 1911!

Date: October 25, 2021

Updating the American Original 1911

Greeley, PA: Auto-Ordnance is proud to introduce the updated stainless steel, all American made 1911! Built to the same exacting standards as its Auto-Ordnance GI model siblings, this new pistol incorporates a variety of upgrades popular with modern shooters. Jodi DePorter, Director of Marketing for Kahr Firearms Group said, "Customers know Auto-Ordnance for its long history of producing quality, historical American firearms. They trust the brand to bring an exceptional 1911 to market, and the new stainless model carries on that tradition." Enhanced features include an adjustable trigger, skeletonized hammer, full-length recoil guide rod, extended beavertail grip safety, and extended magazine release. Frame, slide, and barrel are forged from stainless steel. The slide, sear, and disconnecter are machined from solid bar stock, then heat treated properly for durability over many thousands of rounds. The slide has decorative cuts, and front cocking serrations. Both mainspring housing and front strap are machine checkered at 20 lines per inch. The gun is finished in Savage Stainless Cerakote. The match grade barrel is 5" in length, and chambered in .45 ACP. TruGlo night sights are available, with combat sights standard. Grips are black rubber. Each Auto-Ordnance stainless steel 1911 ships with one 7-round .45 ACP magazine. The pistol has a thumb safety, grip safety, and firing pin block. SKU#1911TCAC6N (night sights), SKU#1911TCAC6 (combat sights).
