

NEW *Lightweight Tommy Gun*

Experience the legend: the Auto-Ordnance Thompson, a .45 caliber semi-automatic rifle echoing America's most famous military submachine gun. Victorious in global conflicts, the Thompson is an iconic historical firearm.

Today's craftsmanship mirrors the original's esteemed quality, enhanced with modern material options. The authentic look and feel extend to the cooling fins, top charging handle, vertical front grip, and Cutts compensator.

The new polymer furniture models come with a lightweight frame milled from durable aluminum. While retaining the classic style, the furniture utilizes a highly durable polymer with a beautiful wood grain finish, as attractive as the original walnut but far more resilient.

Opting for the aluminum receiver combined with this advanced polymer furniture significantly reduces the overall weight, shedding approximately 5 lbs. compared to the steel and wood version. The fixed battle rear sight is standard. Models include versions with the 20 rd stick, or drum magazines with 50 and 100 rd capacities.
