NEW Lightweight M1 Thompson

Auto-Ordnance is proud to introduce a modern evolution of a combat classic with the release of the Lightweight M1 Thompson.

Chambered in the legendary .45 ACP, this new iteration retains the iconic silhouette of the original military workhorse while drastically increasing its portability for the modern shooter.

By engineering the firearm with a high-strength, lightweight alloy receiver and simulated American Walnut polymer furniture, Auto-Ordnance has achieved a significant weight reduction of approximately five pounds compared to traditional steel-and-wood models.

This design choice provides the classic look of the "Tommy Gun" with the added benefits of reduced fatigue for the shooter and a lower price.

Each Lightweight M1 Thompson comes standard with one stick magazine, available in either 30 round or 10 round capacities, offering a perfect blend of historic legacy and modern performance for shooters and collectors alike.

MODEL: **TM1CP** MODEL: **TM1CP10S**
