Auto-Ordnance is proud to announce the latest evolution of a classic American firearm with the introduction of the new suppressor ready, M1 Carbine Short Barreled Rifle (SBR). Chambered in the traditional .30 Caliber, this compact powerhouse blends historical heritage with modern tactical versatility.

The firearm features a stunning walnut stock and matching walnut handguard, with an overall look just like its WWII predecessors. Added to the bottom of the forearm are M-LOK® slots to allow easy accessory attachment.

Built for optimal maneuverability, the SBR boasts an overall length of just 30 inches, anchored by a 12-inch barrel equipped with a standard 1/2-28 threaded muzzle for easy suppressor or compensator attachment. Finished in a durable, non-reflective matte black and shipping with a standard 15-round (AOM230), or 10-round magazine (AOM240), this modernized M1 Carbine SBR offers shooters an unparalleled combination of classic DNA and precision performance for today's dynamic applications.
